# THE LANCET

RESISTING THE TENDENCY TO OVERDOSE THE PATIENT WITH THE DRUGS WHICH ARE USED IN THE TREATMENT OF THE DISEASES OF THE NERVOUS SYSTEM.

THE LANCET writes in its issue of the 12th of January, 1920, that the tendency to overdose the patient with the drugs which are used in the treatment of the diseases of the nervous system is a very real one, and that it is one which is likely to become more and more marked as the treatment of these diseases advances.

It is, therefore, a very real one, and it is one which is likely to become more and more marked as the treatment of these diseases advances. The LANCET writes in its issue of the 12th of January, 1920, that the tendency to overdose the patient with the drugs which are used in the treatment of the diseases of the nervous system is a very real one, and that it is one which is likely to become more and more marked as the treatment of these diseases advances.
